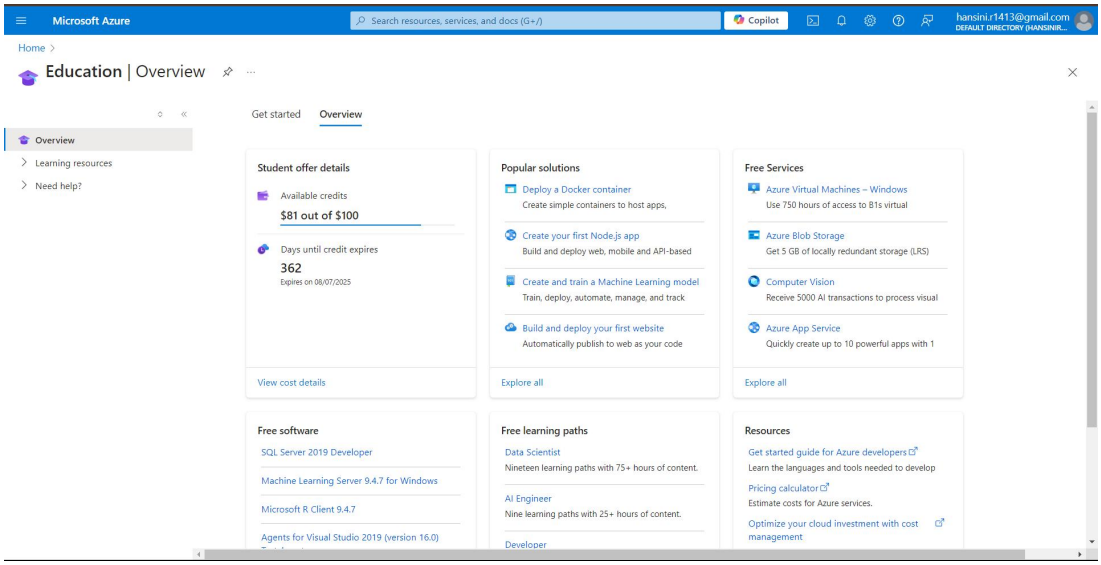
# MICROSOFT AZURE

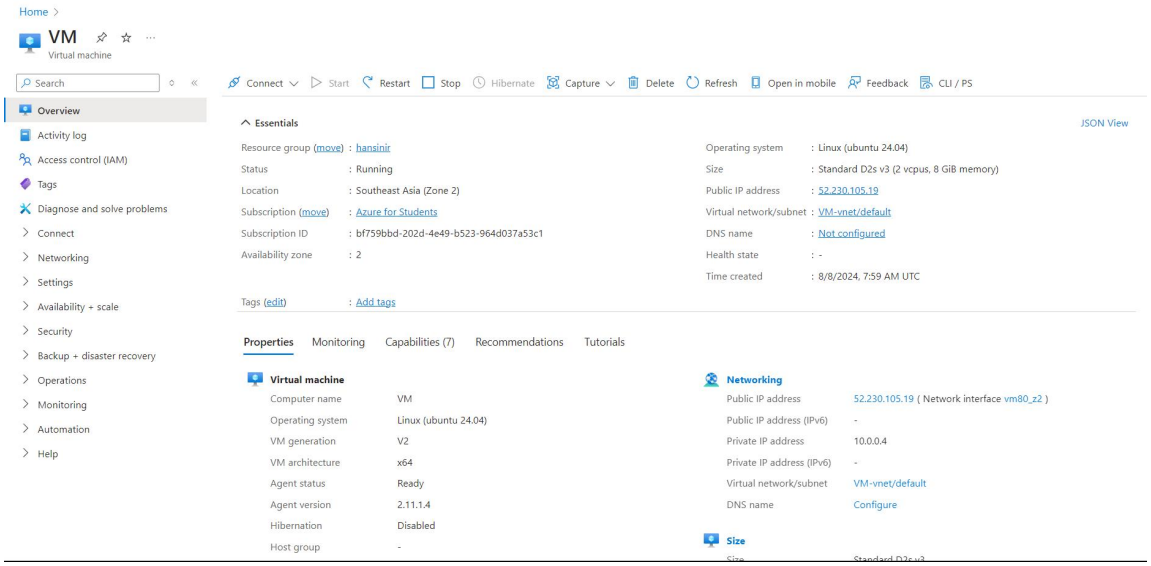
## MODULE 1: CREATION OF VIRTUAL MACHINE

Creating A Virtual Machine (Vm) In Microsoft Azure Involves The Following Steps:

1. Sign in to the Azure portal.
2. Navigate to "Create a resource" and select "Virtual Machine."
3. Choose a subscription, resource group, and region.
4. Configure VM settings, including size, OS, and storage.
5. Set up networking, security, and management options.
6. Review and create the VM, then monitor its deployment.

The VM will be ready to use after deployment.





## MODULE 2: CONFIGURE GIT WITH NETWORK

Requesting a Cloud Shell.Succeeded.

Connecting terminal...

Your Cloud Shell session will be ephemeral so no files or system changes will persist beyond your current session.

hansinir [ ~ ]$ ssh hansinir@52.230.105.19

The authenticity of host '52.230.105.19 (52.230.105.19)' can't be established.

ED25519 key fingerprint is SHA256:wskqFZBfQJaZr9f3zceh7m5u8398gj4g4PMvhQapzjY.

This key is not known by any other names

Are you sure you want to continue connecting (yes/no/[fingerprint])? yes

Warning: Permanently added '52.230.105.19' (ED25519) to the list of known hosts.

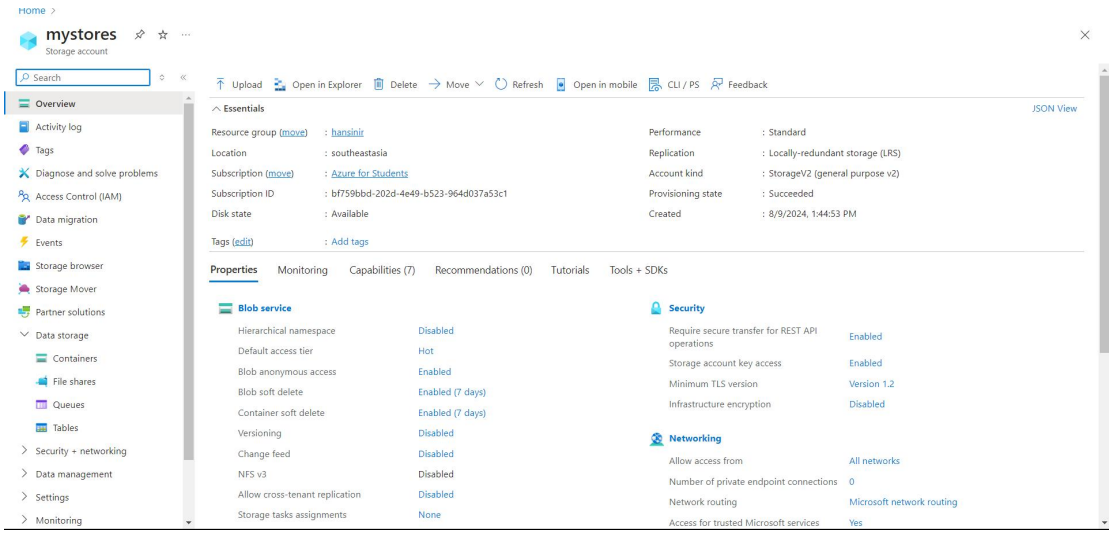
## MODULE 3: CREATION OF STORAGE ACCOUNT

To Create A Storage Account In Microsoft Azure, Follow These Steps:

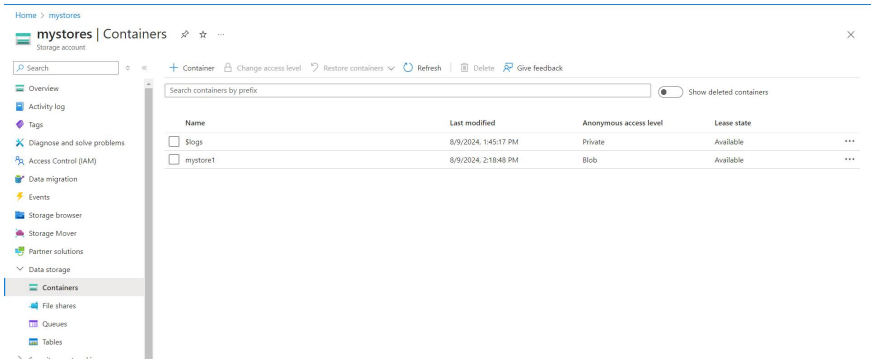
1. Sign in to Azure Portal.
2. Create a Resource
3. Configure the Basics
4. Set Advanced Options
5. Review and Create
6. Access the Storage Account
7. After deployment, access the storage account to manage containers, blobs, files, tables, or queues.

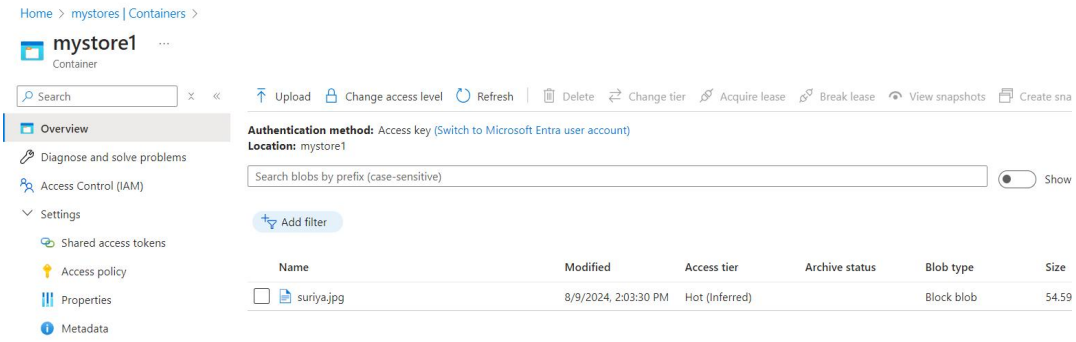


## MANAGING OF STORAGE ACCOUNT :

To Upload An Image Into A Container In An Azure Storage Account, Follow These Steps:

1. Access the Storage Account: Sign in to the Azure portal and navigate to your Storage Account.
2. Create a Container: In the Storage Account, select "Containers" and click "Add Container." Name the container and set the access level (private, blob, or container).
3. Open the Container: Once created, click on the container to open it.
4. Upload the Image: Click the "Upload" button within the container. In the upload window, browse your local machine to select the image file.
5. Configure Upload Settings: Optional - You can set advanced upload options like overwriting existing files, setting metadata, or assigning blob tier.
6. Start the Upload: Click "Upload" to start the process. Once the upload is complete, your image will be stored in the container and accessible based on the access level you set.





**URL PATH OF IMAGE :**

Url: https://mystores.blob.core.windows.net/mystore1/suriya.jpg

**OUTPUT :**

## MODULE 4: CREATION OF STATIC WEB APPS

### Deploying a Static Web Page on Azure

Using Azure Static Web App:

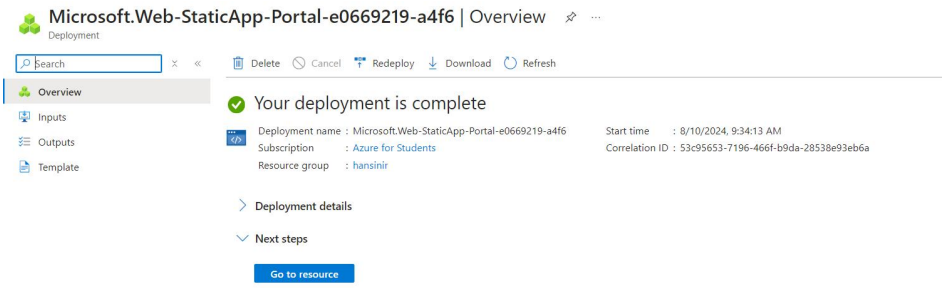
**Prepare Your Site:** Develop your static site and push it to a GitHub repository.

**Set Up Azure Static Web Apps:**

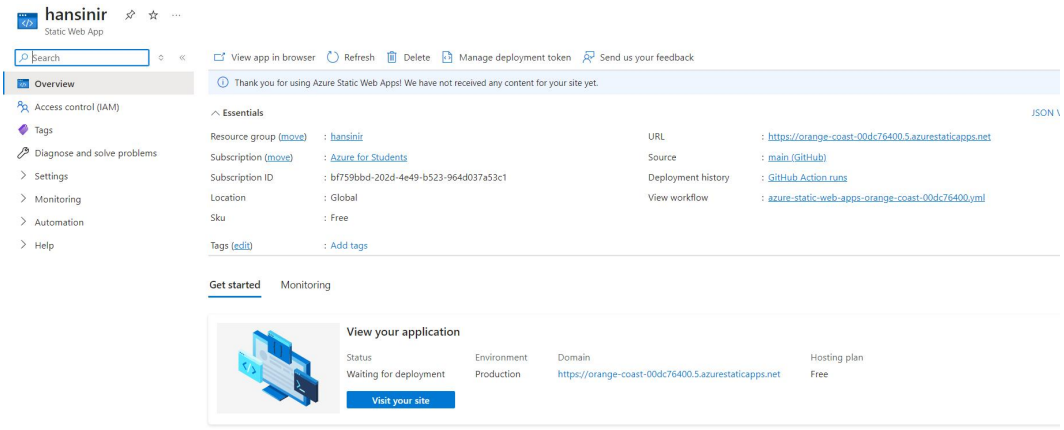
1. Sign in to Azure Portal.
2. Click **Create a resource** > **Static Web Apps**.
3. Connect to your GitHub repo and branch.

**Deploy and Access:**

1. Azure deploys your site automatically.
2. Access it via the provided URL.

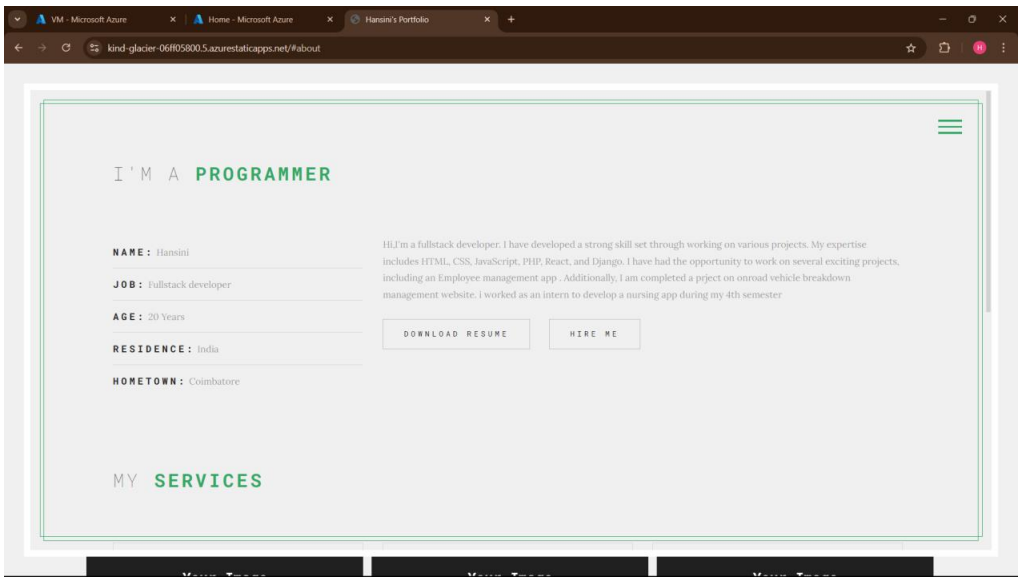


## Access Your GitHub Pages Site :



## OUTPUT :

Url: https://kind-glacier-06ff05800.5.azurestaticapps.net/#about

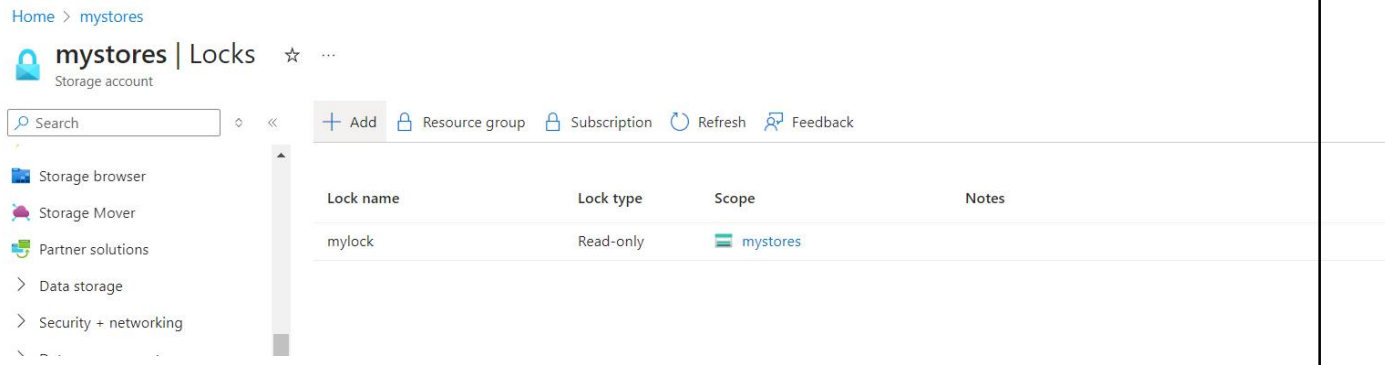


## MODULE 5: CREATION OF LOCK IN STORAGE ACCOUNT

To create a lock on a storage account in Azure:

1. **Go to the Azure Portal**: Sign in at portal.azure.com.
2. **Find Your Storage Account**: Navigate to Storage accounts and select your account.
3. **Add a Lock**:
    1. Go to Settings > Locks.
    2. Click + Add, choose ReadOnly or Delete, name the lock, and click OK.

This prevents accidental deletion or modification of your storage account.



**After creating a lock :**
